

Environmental Charter

Flower Camping du Lac de la Chausselière****

The environment has always been at the heart of our concerns. On a daily basis and at our own scale, we do everything we can to raise awareness and minimize our environmental impact among our guests, employees, and suppliers. That is why we want to go even further.

In order to formalize our environmental commitments and engage in a process of continuous improvement, we have been awarded the Green Key label. The Green Key label recognizes tourist accommodations and restaurants committed to a voluntary, high-performing, and dynamic environmental approach. The label is awarded annually by an independent jury composed of tourism and environmental experts and professionals.

ACTIONS AT THE HEART OF THE CAMPSITE :

Waste management: everyone's responsibility

All our accommodations are equipped with a yellow recycling bag and sorting guidelines to encourage waste separation. We provide compost bins for both rental accommodations and camping pitches. Our waste collection area includes several containers to facilitate sorting (glass, cardboard, packaging, household waste, paper, etc.) as well as two compost bins. We display sorting guidelines in our welcome booklet, on our Flower Campings app, inside the rentals, and in the waste area, in accordance with local regulations. We use our compost as fertilizer for some of our plants.

We carry out all pruning on the campsite ourselves, shred green waste, and spread the wood chips at the base of shrubs and plantings.

Water and energy: let's save them together!

We have installed flow regulators on all taps and water-saving shower heads in our accommodations to reduce water consumption. All our light bulbs have been replaced with low-energy LED lighting.

We use motion sensors and timers for lighting in our shared sanitary facilities, parking area, and waste collection area to limit energy waste. To promote renewable energy, we use a solar thermal system to heat the water in our shared sanitary facilities (thanks to solar panels installed on the roof).

We heat the campsite reception and our function room with a wood-burning stove (using wood from the pruning of our own trees).

Going even further...

Every Tuesday evening in July and August, we organize a small local producers' market for our guests and visitors from outside the campsite, particularly local residents. We have created two Premium areas with remote parking and no vehicle access to reduce pollution and ensure the safety of our guests. Our green spaces are mainly composed of native plant species.

Each year, we commit to new environmental initiatives. Please feel free to share your ideas so that together we can improve our daily habits

Thank you for supporting us and taking part in these efforts during your stay.
